

ONI RELEASE OFFICIAL VIDEO FOR  
"ETERNAL RECURRENCE"

Debut Album, *IRONSHORE*, to drop in Fall 2016

Cayman Islands based progressive metal band [ONI](#) have released their official video for "Eternal Recurrence", which premiered yesterday on [Metal Injection](#). The single is the first from their upcoming full-length debut, *IRONSHORE*, which comes out this fall. The video was shot in the Cayman Islands and directed by Abraham Roofeh. Check it out below.

"Eternal Recurrence" snaps and snarls through a barrage of savage yet controlled violence, counterpointed by passages of unfettered grace and shredding that is as complex as it is melodic. In 4 minutes and 54 seconds Oni demonstrate the breadth of their musical mastery and songwriting abilities, only to tear up the rule-book and do it again and again.

*"The performance was brutal at times. When the guys and myself where done filming we couldn't even walk...After head banging for what felt like an eternity there was nothing better then laying on the ground! When we first saw the treatment for the video...it exceeded all of our expectations. The sunny island felt more dystopian then anything else and our director captured the meaning of the song and the look of the band perfectly."*

#### **ABOUT ONI**

In Japanese folklore, the Oni is a malevolent shapeshifting demon, able to take on many guises as it spreads pain and misery. The constantly shifting, ever-evolving sound of Cayman Island's Oni is no less elusive, though unlike their namesake, amidst the brutality and violence they weave great beauty, and a breadth of heartfelt emotion. Gleefully contorted, crushingly heavy and insidiously melodic, their debut full-length grabs you from the moment it starts and holds you by the throat.

*"We want the songs that we write to not only move us but move our fans and give them the energy to break through another day, another challenge. Our music is very technical, songwriting is so important to everything we do. The songs need to rock, regardless of how well anyone plays their instrument, and we want to write songs that people can bang their heads to, and have fun"*  
- Jake Oni

Formed in 2014, the initial vision was one that was deeply rooted in progressive metal but that had a feel all of its own, to rise above a genre that has constantly churned out new groups to an often numbing effect. With Jake Oni handling vocal duties, Martin Andres and Brandon White on guitar, Chase Bryant on bass and Joe Greulich on drums, they are also perhaps the first metal band to feature a Xylo-synth player, in the form of Johnny D, which adds an interesting and intriguing dynamic.
